Dear Chief Executive

GP Representative Role – National Stroke Network

The National Stroke Network (NSN) is seeking to appoint a representative from the General Practice primary care sector to assist with the current stroke work program. This communication is to request your assistance in making that appointment via your membership.

The Network has some coordination funding provided under a contract between the Stroke Foundation and the Ministry of Health but most members are clinicians and management representatives from within DHBs who are funded by their DHB. A terms of reference for the Stroke Network is attached for your information.

Stroke is the third largest cause of death and the most significant cause of adult disability in New Zealand. Since the network has been in place substantial progress has been made by DHBs to implement clinical guidelines for stroke and improve access to quality stroke services. There is still much work to be done though. In 2019 the NSN is shifting its focus to include more emphasis on stroke rehabilitation and improving access to timely services for at-risk communities. It is also seeking to collaborate with primary care and other relevant communities in both the primary prevention aspect of stroke such as risk factor modification (including atrial fibrillation) and also at the community reintegration level following stroke.

The National Stroke Network meets for full day face-to-face meetings two to three times a year in either Wellington or Auckland and also by brief teleconference at least twice a year. The next full day meeting will be held in Wellington on Tuesday the 19th March.

We would be happy to provide you with further information should you require it. You can contact either me, alan.davis@northlanddhb.org.nz or Kate Lila NSN Administrator: Email – kate.lila@stroke.org.nz

Expressions of interest for this position are requested to Kate by **Friday 1st March 2019**.

Yours sincerely

Dr Alan Davis

Chair: National Stroke Network

Ministry of Health - Clinical Lead Stroke

Terms of Reference for the network are attached. Next meeting is 19th March 2019 in Wellington.
